

Natural Aid Base Cream Ingredients

INGREDIENTS	FUNCTION
 <p>Certified Organic Prunus Persica (Peach) Fruit Extract</p>	<p>The refreshing fruity peach fragrance is from a natural source of extract, laden with essential fatty acids, anti-oxidants and vitamins A, C, B1, B2, B6 & E, protein, iron and potassium. The antioxidants in peach help wounds recover faster and prevent early signs of aging by minimizing oxygen free radicals. Potassium also helps the growth of new cells and aids in hydrating the skin. All the vitamins, minerals and nutrients found in Peach Extract work together to ensure that the skin stays firm, fresh and youthful. Some of the nutrients found in Peach Fruit Extract assist with tissue repair and skin regeneration while others promote the natural suppleness and firm structure of the skin.</p>
 <p>Certified Organic Calendula Officinalis Plant Extract</p>	<p>Calendula is a natural antiseptic and one of the most healing herbs in the world. Prepared from the common Marigold plant, it has high amounts of flavonoids, plant-based anti-oxidants that protect cells from being damaged by free radicals as well as antimicrobial and skin repairing compounds. It helps wounds heal faster by increasing blood flow and oxygen to the affected area, helping the body to grow new tissue. Calendula helps prevent dermatitis or skin inflammation in breast cancer patients undergoing radiotherapy.</p> <p><small>Source: Calendula, University of Maryland Medical Center http://ummm.edu/health/medical/altmed/herb/calendula#fbz337igSVZ3y</small></p>
 <p>Certified Organic Aloe Barbadensis (Aloe) Leaf Juice</p>	<p>Aloe Barbadensis(Aloe Vera) leaf juice extract soothes skin and serves as an anti-inflammatory. Aloe effectively stimulates proteolytic enzyme action in skin tissue. Aloe also acts as a moisturizing agent. The herb can be an effective humectant, increasing water retention in the skin. It moisturizes skin and also has antimicrobial properties against many common bacteria and fungi.</p>
 <p>Certified Organic Prunus Amygdalus Dulcis (Sweet Almond Oil)</p>	<p>Sweet almond oil with its moisturizing qualities is ideal for dry skin. Rich in vitamin E, A, B1, B2 and B6, its high content of essential fatty acids effectively balances the moisture in dry and irritated skin and improves the skin's barrier function keeping it smooth and supple. It is easily absorbed hence does not leave the skin sticky and oily.</p>
 <p>Certified Organic Mauritia Flexuosa (Buri) Fruit Extract</p>	<p>This strengthening, smoothing and nourishing extract has the highest natural occurrence of pro-vitamin A available (carotenoids). With high levels of anti-oxidants from the vitamin E and beta-carotene, Buri Oil is an excellent free radical scavenger, helping to protect the skin from environmental damage and has also an incredible ability to moisturise and re-hydrate.</p>
 <p>Certified Organic Persea Gratissima (Avocado Oil)</p>	<p>Extracted from organically grown avocados, Avado Avocado Oil is rich in anti-oxidants, proteins and fats, lecithin and potassium and vitamins A, C and E. One of the most important avocado benefits for skin is its ability to soothe dry and itchy skin. The oil is easily absorbed by the skin and can act as an excellent moisturizer or a skin care agent to keep the skin soft and supple, promoting increased skin elasticity.</p>
 <p>Certified Organic Shea Butter</p>	<p>Shea butter is so good for the skin because of its high content of palmitic, stearic, oleic and non-saponifiable fatty acids. Antioxidants smooth wrinkles and scars. Moisturises and promotes skin softness and elasticity and acts as an anti-irritant with allergies propensity. Prevents & treats redness and rashes.</p>
 <p>Certified Organic Cocoa (Theobroma Cacao) Butter</p>	<p>Cocoa butter has been called the ultimate moisturizer, and has been used to keep skin soft and supple. It is one of the most stable, highly concentrated natural fats and is readily absorbed into the skin and often recommended for treatment of skin conditions such as eczema and dermatitis. When applied topically, it creates a barrier between sensitive skin and the environment and also helps retain moisture.</p>
